Nikko Stirling
OPTICS FOR SPORT, SINCE 1956

Nighteater

**30mm
and
1 inch**

Named the NIGHTEATER as it was developed for the Professional Kangaroo Shooter in Australia who hunts exclusively at night, shooting kangaroos at 200-300m. The NIGHTEATER Scopes are made in a new truly state-of-the-art manufacturing facility. The lenses we use are Grade A which are the best available. The lens coatings used are also a key factor in the clarity achieved by the NIGHTEATER range.

30mm Model

Extended Mil Dot
on 30mm

12x50

4-16x50

6-24x56

6-24x56 Air Gun

6-24x56 Illuminated Reticle

Features found on all NIGHTEATER scopes:

- Grade A lenses
- Fully multicoated lenses with MICROLUX™ ETE coatings
- One piece body for strength, rigidity and improved accuracy.
- Saddle parallax adjustment from 10m to infinity.
- More practical than older objective lens adjustments.
- Stylish built in sunshade
- Fast focus eyepiece
- Waterproof and each scope is tested to 1.5m
- Shock tested more than 200 times to the equivalent of 240kg!

Features of the 30mm style

- Extended Mil-dot which allows for greater targeting ranges before adjustment required
- Large side wheel available. Standard on the 6-24x56AG.
- 120mm sunshade available. Standard on the 6-24x56AG.
- Precise target style adjustments
- Illuminated reticle available on 6-24x56AG
