Savage ArmsTM
The Definition of Accuracy

**SAVAGE
2014**

THE SAVAGE RIFLEMAN'S CREED:

**THIS IS
MY RIFLE.**

There are others like it, but this one is mine.

My rifle is my best friend.

I must master it as I must master my life.

My rifle, without me, is useless.

Without my rifle, I am useless.

I must fire my rifle true.

I must make one quick kill...

With one shot, I must make one quick kill...

One clean kill...One humane kill.

**ONE SHOT.
ONE KILL.**

To view the original Rifleman's Creed, which inspired ours visit:
WWW.USMCPRESS.COM/HERITAGE/MARINE_CORPS_RIFLEMANS_CREED.HTM

During World War II, the United States Marine Corps adopted its now-famous Rifleman's Creed. It is based on the premise that all Marines are, first and foremost, riflemen. To this day, new recruits are required to learn and recite this creed.

Lt. Col. Michael Stroff, III, had a long career as a United States Marine. He graduated from Scout Sniper Instructor School in 1979, and would eventually supervise the Scout Sniper Instructor program at Quantico, Va. His son, Mike Stroff, IV, was never a Marine, but thanks to his father, he embraced the ideals of the rifleman, making a career as a hunter, outfitter, and the host of "Savage Outdoors TV." We are proud to include them in the Savage family.

Together, the Stroffs demonstrate that the dedication and honor of the rifleman can and should apply to all outdoorsmen and women. Certainly the ethical hunter must learn to be a rifleman first, to ensure a quick, humane kill on game.

Inspired by the original USMC creed, we decided to pen our own for those who take arms to the outdoors instead of to the battlefield. Not surprisingly, it starts with the same phrase, "This is my rifle. There are others like it, but this one is mine."

That is because the relationship between the shooter and their rifle is the main difference between a rifleman and a more casual rifle owner. A rifleman is dedicated to mastering their craft both on the range and on the hunt.

If that describes you, we can relate. You are not the only person who feels that connection to your favorite Savage. There are a lot of proud employees here who put that same kind of dedication and passion into building your rifle. So, in many ways, these proud men and women feel like your Savage is still very much their rifle.

SAVAGE
2014

Every barrel is fully threaded into its action then locked in place with a barrel locknut. The resulting dead-nuts tolerance delivers dead-nuts accuracy.

THE SCIENCE AND ART OF ACCURACY

There is a science to building an accurate barrel. The bulk of that science leans on specialized machinery as well as experienced operators. Savage proudly employs both.

Each and every Savage centerfire barrel—from the one going on a Team Savage competitor's F Class rifle to the one going on your kid's first deer rifle—is checked and, if needed, hand straightened by the same skilled craftsman.

TOP VIEW

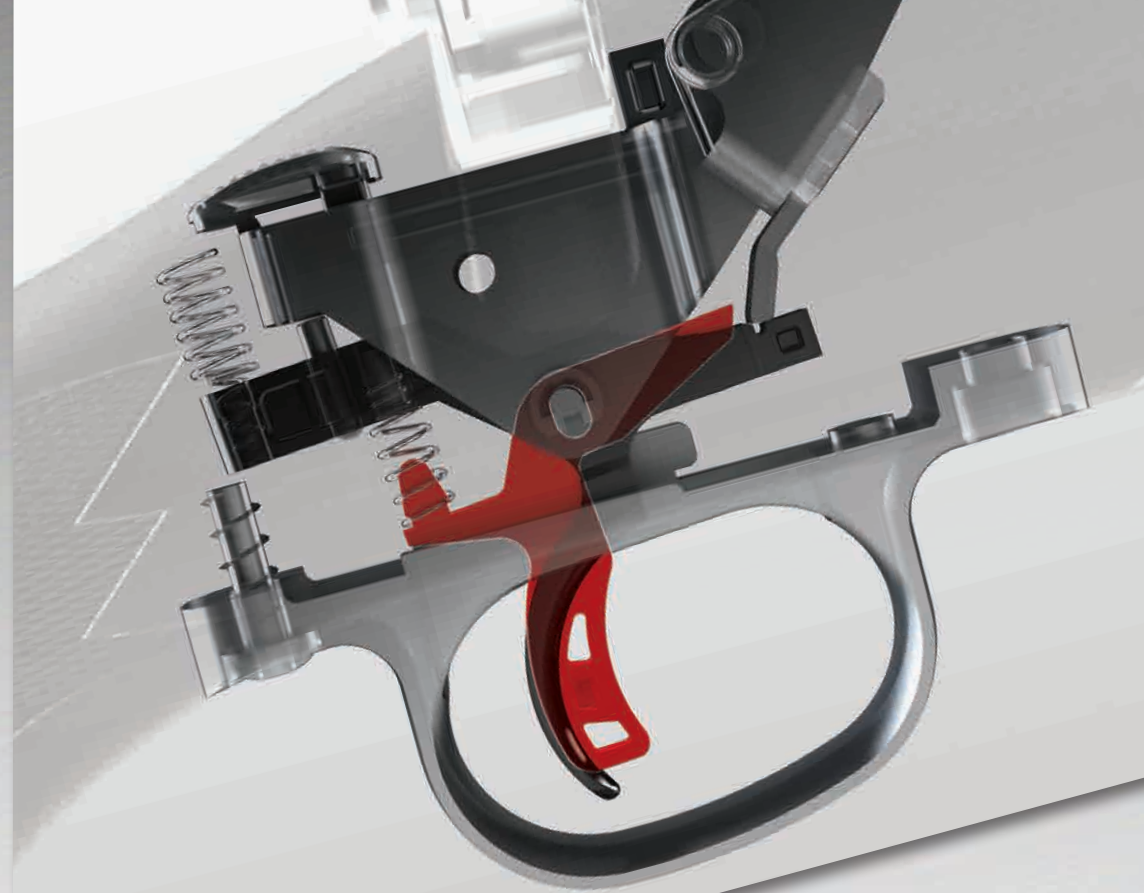

ACCUSTOCK™

The energy released when a cartridge is fired creates a series of harmonic waves that travel the length of the barrel. The movement that accompanies these waves can affect how the bullet travels. That's why any rifle with respectable accuracy will have a firmly bedded action.

Traditionally, an action is secured to the stock by one or two screws that pull the action directly downward into the stock. This bedding method provides rigidity on a single linear plane—up and down. The Savage AccuStock consists of a rigid rail system firmly embedded in the stock throughout the fore-end of the rifle. Rather than unidirectionally engaging the action at one or two points, the AccuStock engages the action three dimensionally along its entire length.

ACCUSTOCK™

For more information, see the video at savagearms.com

ACCUTRIGGER™

The Savage AccuTrigger can be adjusted by the owner. Trigger pull weight varies by model from 6 ounces to 6 pounds. Shooters get a crisp release with no creep.

For more information, see video at savagearms.com

ACCUTRIGGER™

Until recently, it was virtually impossible to find a factory firearm with the crisp, light trigger that hunters and target shooters demand. That all changed when Savage introduced the AccuTrigger™. The first-of-its-kind system is easily adjustable by the shooter, offers a light, clean pull with no creep, and prevents the firearm from discharging if jarred or dropped. These features have made the AccuTrigger the standard by which all modern triggers are judged.

The Savage AccuTrigger gives a shooter the flexibility to set the trigger pull to their

individual preferences without having to pay a gunsmith to adjust it. Even when adjusted to its lowest setting, the AccuTrigger is completely safe. When maintained and adjusted as intended, the AccuTrigger cannot accidentally discharge during normal use, even if it is jarred or dropped.

The integrated AccuRelease must be completely depressed for the rifle to fire. While the trigger is being pulled, the AccuRelease is intentionally depressed, which unblocks the sear and allows the rifle to discharge.

The AccuTrigger™ has a single adjustment location

THE NEXT GENERATION OF SHOOTERS

When introducing a newcomer to our rich shooting sports heritage, there's nothing more important than their first firearm. The right one fits their physical size, is easy to use, eliminates harsh recoil, and provides a platform for safe, accurate shooting. Savage has been building firearms for more than a century, and we've learned a lot about the unique needs of individual shooters. We've used this knowledge to create a full line of rifles and slug guns crafted to meet the specific needs of the user, including youth and female shooters. We minimized overall weights, built stocks around the dimensions of smaller-framed individuals, and gave the firearms you see here features that help new shooters feel more comfortable behind the gun. That's why you can trust their most important first experiences to Savage.

When it comes to rifles, there will probably always be a jack-of-all-trades ranch rifle that spans the back window of a pick-up truck. But even the traditional world of firearms has recognized the precision that comes with specialization, and no firearms company has achieved it as effectively with bolt-action rifles and slug guns as Savage.

THIS IS MY RIFLE, there are many like it, but this one is mine. I have hunted all over North America with my 11 Compact Hunter and it has never let me down. In places like the rugged terrain of the Alaskan Range, a 5 1/2-pound rifle is nice, but one you can count on for a quick, humane, one-shot kill in those same conditions is even nicer. Check it out on page 12.

110 BA

LAW ENFORCEMENT SERIES

Rifles in this series have many different features for many different purposes. But every one of them is built on the legendary Model 110 action, the most accurate factory action ever.

The Savage Model 10/110 BA, for example, is as radical as the extreme accuracy it delivers. Its modular design enables the operator to customize it to mission-specific demands by selecting from a virtually infinite array of aftermarket accessories including buttstocks, magazines, grips, bipods and more. Built for pinpoint accuracy, the BA is the flagship of the Savage Law Enforcement Series.

TARGET SERIES

TARGET SERIES

Anyone who shoots a rifle expects accuracy. But there is a special breed of accuracy enthusiast who forever chases the one-hole group. Once they attain it, they begin to chase that group at longer and longer ranges. Perhaps the most elite collection of these accuracy purists are the shooters of Team Savage. And they choose rifles in the Target Series.

With dozens of decisive world-class titles to their credit, the firearms in the series are elite rifles for the elite shooter who wants to test their skills on the ultimate playing field: the 1,000-yard range.

PRECISION ACTIONS

Our line of Precision Actions allow gunsmiths to use the same actions found in our Precision Target Rifles for customized firearms. The actions are available with both standard and .223 bolt heads and in three configurations: Right Bolt/Right Port, Right Bolt/Left Port, and Dual Port. The stainless Precision Target Actions also come with the Target AccuTrigger™, adjustable from 6 ounces to 2.5 pounds. Actions include the bolt assembly, AccuTrigger assembly, barrel locknut, recoil lug and trigger guard.

DUAL PORT ACTION
 The 12 Benchrest has a specialized dual-port action for fast easy left-load, right-eject functioning.

VARMINT SERIES

Prairie dogs, beware. The Varmint Series raises the bar on accuracy, thanks to features like our revolutionary AccuTrigger™, button-rifling, free-floating barrels and a variety of stock configurations. Select different rates of twist help to stabilize heavier bullets during long-range shooting—a Savage exclusive.

Whichever model or configuration you choose, even long distances and fickle prairie winds won't be enough to save varmints that linger in your crosshairs.

ONE SHOT ONE KILL

SAVAGE RIFLEMAN GUY EASTMAN

THIS IS MY RIFLE. there are many like it, but this one is mine. I make my living hunting the American West, where shots can be long. That's why I love my 111 Long Range Hunter. I can always count on it for a quick, humane kill on all the game I hunt. You can see the details of my rifle on page 12.

AXIS
SERIES

SAVAGE ARMS

AXIS

Due to its affordability, the AXIS is often a hunter's first exposure to the world of Savage. Knowing that, we believe it should be representative of the dependability and accuracy for which Savage is renowned. So, in case you're wondering how we can make the AXIS in the USA and still save you money without sacrificing performance, here's the secret: We didn't design a cheaper rifle, we designed a better way to make a Savage.

SAVAGE RIFLEMAN DICK SCORZAFAVA

THIS IS MY RIFLE. *there are many like it, but this one is mine. When I say the Model 16/116 Bear Hunter is mine, I really mean it. I have studied and hunted bears my whole adult life with the same dedication that Savage has studied and perfected the art of the accurate rifle. My rifle is the result of our collaboration. Hunting is serious business. A one-shot kill is the ethical way to take a bear—and the safest. Check out my rifle on page 13.*

AXIS II

The new AXIS II package rifle is the perfect way for a new hunter to go from the store to the field. It is built on our popular AXIS rifle platform with a couple of significant tweaks. First, we've added the legendary AccuTrigger™ for optimized accuracy, then we topped it with a factory-mounted, bore sighted Weaver® KASPA™ scope (MSRP \$150). All you need to do is fine-tune your zero, practice and go hunting.

SINGLE-SHOT RIMFIRE SERIES

The best way to learn to shoot well is one shot at a time. Single-shot rimfire rifles are perfect for new shooters all the way up to those who want to perfect the art. That's why our selection of single-shots are not toys. They have serious big-gun features like an adjustable AccuTrigger™, button-rifled barrels and adjustable peep sights in some models. Sure, you've only got one shot, but with a Savage you can make it count.

MAGNUM RIMFIRE SERIES

To us, there is no such thing as "just a rimfire." These are serious rifles. If you have any doubt of that, just look at the proven performance of 17 HMR or 22 WMR, there is no reason to look any further than Savage.

B.MAG

When the 17 Win. Super Magnum rimfire load was under development, Savage accepted the challenge of designing an entirely new rimfire rifle from the ground up. The Savage B.MAG isn't simply a re-chambered version of an existing platform; it's a whole new class of rimfire rifle.

The high velocities of these new loads led us to design features into this rimfire that are typically reserved for our centerfire rifles. In order to maximize accuracy in this long-range shooter, we have utilized our unique thread-in barrel headspacing system, rear-locking lugs and a cock-on-close bolt. Of course, we would never dream of engineering an accuracy machine like the B.MAG without capping it off with our legendary, light, crisp AccuTrigger™.

B.MAG FEATURES:

- Compact rimfire action with rear locking lugs and cock-on-close bolt
- Same thread-in barrel headspacing system as our centerfire rifles
- Center-feed rotary magazine
- Light, crisp AccuTrigger™ is user-adjustable without special tools
- Soft rubber butt pad
- Hidden action-screws

The 17 Win. Super Magnum delivers velocities of 3000 fps with a 20-grain bullet, or 2600 fps with a 25-grain bullet. This substantial increase in velocity over other rimfire cartridges yields flat trajectories, and downrange energy sure to be a hit with shooters of all types. No matter how you measure performance: velocity, energy, trajectory, or wind drift, it offers centerfire performance at a rimfire price.
