

Smith & Wesson® 2005

MADE IN U.S.A.
SMITH & WESSON
SPRINGFIELD, MASS.

For over 150 years, Smith & Wesson has been a leader. A leader in innovation. A leader in design. A leader in manufacturing. That is the legacy of Horace Smith and D.B. Wesson. Smith & Wesson has become part of the fabric of America's past and present. Now we look to the future.

The Smith & Wesson brand is one of the most recognizable in the world. As we continue to develop leading technology and build superior handguns, we remain committed to bringing our customers the finest products to create an exciting and complete shooting experience. This year's innovations, the Model 460XVR - with the highest muzzle velocity of any production revolver on earth - and the unequaled new family of 1911's show our dedication to innovative handgun manufacturing. You can expect no less from Smith & Wesson...and we expect no less from ourselves. That is our pledge to you. That is the future of Smith & Wesson.

NEW FOR 2005

Model 460XVR™

Introducing the Model 460XVR with the highest muzzle velocity of any production revolver.

Smith & Wesson's Model 460XVR will fire a variety of cartridges - the 460 S&W Magnum, the 454 Casull and the .45 Colt.

The 460 S&W Magnum® Cartridge:

- is the World's Fastest Revolver cartridge at 2,330 fps!
- is the World's Most Powerful .45 Caliber Revolver Cartridge, with 2,400 ft/lb.
- has Powder Capacity in Excess of 50 Grains.
- handles Operating Pressure up to 65,000 psi.
- handles Projectile Weights from 200 to 400+ Grains.

2.25"

460XVR	163460	460 S&W Mag.	5	A2	XL	8-3/8"/21.3cm	15"/38.1cm	72.5oz./2055.4g	GR	SA/SH	FS/CS	ZS	\$1253.00

We all grew up hearing the phrase, "Faster than a speeding bullet..." but not when it is fired from Smith & Wesson's new Model 460XVR, with *the highest muzzle velocity of any production revolver on earth*. The Model 460XVR is so revolutionary that it required an entirely new designation...XVR, X-treme Velocity Revolver.

Starting with their Extra Large Frame, the Smith & Wesson engineers worked to deliver maximum velocity – over 2,300 feet per second – to reach the target faster than ever before. The 460XVR has interchangeable compensators to accommodate every load and includes a HI-VIZ® Green-dot front sight for accurate target acquisition. Plus, its "gain-twist" rifled barrel means superb long-range accuracy (beyond 200 yards) with every shot! Only Smith & Wesson could deliver this much power, this much velocity and this much accuracy in a precision, production revolver.

Smith & Wesson's respected and time-tested Model 65 and Model 66, among the first of the stainless steel Magnums, have entered the 21st Century in a bold way. Their heavy-duty replacements, the new Model 619 and Model 620, are built with two-piece, semi-lug barrel construction for *enhanced performance and greater durability*. Each is offered with a 7 shot cylinder. Whether you choose the Model 619 with a fixed sight or the Model 620 with an adjustable, target-style sight you will be impressed with its construction and reliability.

Model 60

The Smith & Wesson® Model 60, the world's first stainless steel revolver, was a success from its introduction in 1965. Praised by both law enforcement and sportsmen, the Model 60 was a stainless steel version of the Chiefs Special® and began the era of stainless steel handgun production. New for 2005 is a 5" barrel length added to a lineup of 2-1/8" and 3" barrels. The Model 60 is *the perfect choice for those seeking a small frame, all-steel revolver with greater recoil control and proven performance.*

Model 625 - Jerry Miculek Professional Series™

Jerry Miculek knows a little about ultra-fast performance. His record 12 shots, two loads of six with a reload in between, in under three seconds set the standard for speed shooting. Smith & Wesson and Jerry Miculek have collaborated to design a revolver to deliver ultra-fast performance - the new Model 625 Jerry Miculek Series. Its special features include a Miculek Style .265" Wide Grooved Speed Trigger, special Wooden "Jerry Miculek" Grip and Gold Bead Patridge Front Sight on an interchangeable front sight base. It comes complete with five Full-Moon Clips for ultra-fast "Jerry Miculek" style reloads. The Jerry Miculek Professional Series revolver comes with its own unique serial number run starting at JMP0000.

Superior handgun performance has always been the goal of Smith & Wesson's expert gunsmiths. Crimson Trace® Lasergrips are now available on five new models to enhance their performance. Crimson Trace Laser technology gives every shooter ultimate target acquisition and accuracy.

Designed to be activated by your grip, the Rubber Overmold Activation Button *immediately* turns the laser beam on, acquiring the target at the speed of light and holding the point of aim through thousands of rounds of fire. The bright, clear beam lets the shooter focus on the target instead of the gun, saving critical time. Often just the sight of a laser can cause a subject to submit, avoiding a more serious encounter.

Exclusive to Smith & Wesson, the Model SW1911 with Olive Drab Crimson Trace Lasergrip and the Model 1911PD with Desert Tan Crimson Trace Lasergrip, deliver outstanding performance to what are already considered America's finest pistols.

The Model 410S has a Dual Activation Button in the Rubber Overmold which allows ambidextrous use. Advanced targeting technology combined with Smith & Wesson's superior handgun performance delivers extreme accuracy and consistency. A perfect pistol combination for any serious shooter.

Crimson Trace Lasergrips are available on three small frame revolvers – Model 637, Model 642 and Model 432PD – and utilize a Laser Wraparound Grip that is both compact and comfortable. "Combat Rubber" is used throughout the entire grip for maximum recoil control and comfort, even on the most lightweight revolvers. The modestly contoured, longer grip design delivers fast grip registration, natural aim and is easily activated by left or right-handed shooters. For the ultimate targeting acquisition in a small frame revolver turn to Smith & Wesson with Crimson Trace Lasergrip technology.

EXCLUSIVE Olive Drab Lasergrip
.45 ACP

- **INSTINCTIVE ACTIVATION**

Just grip your gun naturally and the laser comes on. No on/off switch to find. No extra button to push. No fumbling when seconds count.

- **LIGHTENING FAST TARGET ACQUISITION**

You'll shoot faster and more precisely than you ever thought possible with a handgun. Lasergrips clear, bright, long-lasting laser beam puts you on target at the speed of light.

- **REPEATABLE PINPOINT ACCURACY**

Tack-driving accuracy time after time. The laser adjusts easily and holds point of aim through thousands of rounds of fire.

- **ENHANCED FIELD OF VISION**

Now you can confidently focus on the target instead of the gun - the natural reaction whenever under pressure.

NEW FOR 2005

1911 Family of Pistols

John Moses Browning began his gunsmithing career in Ogden, Utah over 125 years ago. With more than 100 handgun and rifle patents, he is considered the father of the 1911. The Model 1911 has evolved since those early days. At Smith & Wesson, we have made an enormous commitment to this special pistol and have grown our family of SW1911s to include the widest variety of materials, finishes and unique features.

Our commitment to pistols and the SW1911 has never been greater. Whether you want Carbon Steel, Stainless Steel or Lightweight Scandium Alloy construction, you are sure to find the highest quality 1911s made. Through Smith & Wesson, John Browning's timeless design has reached a level of quality and performance never before thought possible. For the finest selection of SW1911 pistols...turn to Smith & Wesson.

NEW PISTOLS FOR 2005

In 2005, Smith & Wesson is continuing our commitment to pistols while raising the bar on quality and performance. Our newest SW1911 pistols include a Carbon Steel Model SW1911, a high-performance Doug Koenig Professional Series SW1911 and a 5" Scandium Model SW1911. For ultimate accuracy, Crimson Trace® Laser technology is offered in two colors on two Model SW1911s and on the Model 410S. The Model 22A, with polished sides on the slide and barrel, has been added to the line of superior performance Rimfire pistols. Smith & Wesson is *the premium handgun manufacturer in terms of pistol variety, quality and performance.*

Doug Koenig
www.smith-wesson.com

Doug Koenig is considered by many to be *the world's most accurate pistol shooter*. The first handgun he ever bought was the Smith & Wesson Model 686. That was the beginning of a remarkable winning relationship between Doug Koenig and Smith & Wesson. He began competitive shooting in 1989 and within four years had won the Bianchi Cup (2 titles) and the World IPSC Championship. At the age of 20 he became the first shooter to fire a perfect score (1920) at the National Action Pistol Championships. Doug has won the Master's International Pistol Match 11 times and, since its inception, has been the only competitor to fire a perfect score (5 perfect scores in 9 championships). In fact, Doug has fired more perfect scores in the sport of action pistol than any other shooter in the world since his first perfect score was shot in 1990. He is truly a master of the sport. Doug has come to represent the best of Smith & Wesson...accuracy, reliability and performance. By the way, his choice of handgun is the Smith & Wesson Model SW1911.

Pistols

www.smith-wesson.com

Over 90 years ago Joe Wesson, son of founder D.B. Wesson, began developing Smith & Wesson's first pistol, soon to be known as the Smith & Wesson® .35 Automatic. D.B. instilled in his son the belief that Smith & Wesson handguns should be the best, safest and most reliable handguns in the world. This has been behind every pistol built at Smith & Wesson and continues today.

Smith & Wesson produces more pistol models and chamberings than any other handgun manufacturer in the world. From the .22 Rimfire to 9mm to the superior ergonomics of the Sigma Series® and the unparalleled performance of Smith & Wesson's family of 1911s – reliability, quality and performance are built into every model. With the largest variety of models and construction materials, you are sure to find the pistol that best suits your needs. Whether for law enforcement, personal protection or competitive target shooting, the pistol owner will find the performance unequalled. That is how Joe Wesson wanted it and how the gunsmiths at Smith & Wesson build them today.

Model SW1911

When Smith & Wesson introduced their version of John Browning’s famous 1911 in 2003, the response was overwhelming. That success was followed in 2004 with the Model SW1911 Adjustable, competition ready with adjustable rear sight and match trigger, and a Commander-sized, lightweight Scandium framed Model SW1911. The response was once again overwhelming. Now, for 2005, Smith & Wesson is showing their commitment to excellence in pistol manufacturing with the addition of five new 1911 models.

For the ultimate competitive shooting pistol, Smith & Wesson is introducing the Doug Koenig Professional Series Model SW1911, designed in collaboration with Doug Koenig, the world’s most accurate pistol shooter. The two models feature Doug Koenig’s Speed Hammer, Flat Competition Speed Trigger with Overtravel Stop and a variety of other special features that deliver superior accuracy and performance.

The new Carbon Steel Frame Model SW1911, with a 5” barrel, has Novak Lo Mount Carry Sights and an Aluminum Match Trigger with Overtravel Stop. The strength of the carbon steel frame and the proven design of the Model SW1911 combine for an extremely strong and dependable pistol. New also is the Scandium Alloy Frame SW1911 with 5” barrel, for a more lightweight, highly durable body.

With a remarkable selection of SW1911s, *Smith & Wesson continues its tradition of innovation and its commitment to bringing shooters the finest quality and high performance firearms.*

Sigma Series®

The *Sigma Series* is the most ergonomically designed production pistol in history.

Ergonomics engineers and computer analysis were brought together to perfect Sigma's 18 degree ergonomic grip design so that the moment you raise it, your point of aim is straight, every time. Aiming a Sigma is as natural as pointing your finger! The Sigma Series is available in either 9mm or .40 S&W and both are available with a matte stainless slide and either a black frame or a NATO green frame.

SW990L Series

The SW990L delivers immediate response to any threat with a newly designed, lightning fast trigger pull that is consistent from the first to the last shot. A collaboration between Smith & Wesson and Walther, the safe, simple design delivers accurate shot placement and is exactly what you need during a critical moment. The ambidextrous magazine release allows for use by left or right-handed shooters and the interchangeable backstraps (included) provide the perfect fit for individual hand sizes. The full size SW990L has an equipment rail for adding a light or laser to improve low light sighting and targeting. For both law enforcement and personal protection *there is no better defense than the unparalleled action of the SW990L.*

LadySmith® Handguns

You can't build an effective and correct handgun without first knowing and talking to the actual shooter. That has always been a Smith & Wesson trademark...we listen. Smith & Wesson, *the first and most respected manufacturer for womens' handguns*, has designed a line featuring small frame revolvers as well as a compact 9mm pistol. We believe that women should have the power to defend themselves... and that power is best found in a Smith & Wesson.

Laser Engraving

Make your handgun as unique as you are with Smith & Wesson laser engraving. LaserSmith technology lets you personalize your handgun in many ways – from initials and names to select artwork – quickly and very affordable. Any stainless steel or carbon steel component of your Smith & Wesson handgun can be laser engraved to stand alone as your own personal statement.

For a brochure detailing the laser engraving process, with illustrations of artwork available, call 1-800-331-0852.

JERRY MICULEK PROFESSIONAL SERIES

Model 625 JM

SKU: 160936
.45 ACP

Jerry Miculek
www.smith-wesson.com

The first time you see Jerry Miculek in action you are in disbelief. Is it a trick? Did it really happen? Only in slow-motion can you really appreciate his artistry. With more championships than any other living revolver shooter, Jerry is known as *the fastest revolver shooter in the world*. His record of twelve rounds – two 6 round loads with a reload in between – in under three seconds is unequalled.

Jerry has won the International Revolver Championship for the last 12 years, holds six World Shoot-Off Championships and earned five revolver speed shooting world records. It is a record of accomplishment that stands above all the rest. He chose Smith & Wesson because it is "...amazingly fast, accurate, and above all else, 100% reliable." If you are lucky enough to see him in action, you will be in awe...and notice that he shoots a Smith & Wesson Model 625.

Revolvers

www.smith-wesson.com

The tradition of innovation at Smith & Wesson began with the very first model Horace Smith & D.B. Wesson introduced in 1857, the revolutionary .22 Rimfire. That tradition has continued for over 150 years and continues today with the introduction of the Model 460XVR with the highest muzzle velocity of any production revolver on earth.

Smith & Wesson has always been the leader in innovation and quality. Our customers trust us to build the very best handguns. Our gunsmiths and engineers continually develop the advancements we have become known for. We manufacture the *widest range of revolver models – from the most lightweight, full-featured personal protection to the world's most powerful revolver and now the world's highest velocity revolver* – all with the same commitment Horace and D.B. made in 1857, to deliver the finest, most accurate and reliable products possible.

Rimfire Revolvers

Smith & Wesson's line of Rimfire revolvers is *the perfect choice for competition, plinking and small game hunting*. Descended from Smith & Wesson's first revolver, built over 150 years ago, they are available in both small and medium frame. The small frame Rimfire is built on an aluminum alloy frame with a 2" or 3" barrel. The medium frame, chambered for .22 LR or .22 Magnum, is perfect for target competition. The Model 617 is also available with a 10-round cylinder. Varmints beware!

Airweight® Revolvers

When you need a lightweight carry revolver, you turn to Smith & Wesson's Small Frame Airweight Series. They are the original aluminum, small frame revolvers chambered in .38 S&W Special +P or .32 H&R Magnum. They are available in three distinct hammer styles – the "Chiefs Special" with exposed hammer, the "Centennial" frame with fully enclosed hammer and the "Bodyguard" frame (.38 S&W Special +P only) shrouded hammer. *Three styles with one idea...perfect personal protection.*

Small Frame (J) Stainless Steel Revolvers

When the first all-steel small frame (J) revolver was introduced in 1950, it became an instant success. Originally named the Chiefs Special by the International Association of Chiefs of Police, it has become *the first choice for those who insist on an all-steel, small frame revolver with greater recoil control and proven performance*. This classic revolver is available in three hammer designs - the "Chiefs Special" with exposed hammer, the "Centennial" frame with fully enclosed hammer and the "Bodyguard" frame shrouded hammer.

Medium Frame (L) Revolvers

Smith & Wesson introduced the Model 686 in the early 1980's. It was chambered for .357 Magnum and .38 S&W Special calibers. The 600 series Smith & Wesson revolvers are true workhorses for both duty and sporting use. They are available ported and unported with a choice of 6 or 7 round cylinders.

Smith & Wesson's large frame revolvers are the *first choice for handgun hunters and competitive shooters*. These stainless steel revolvers are available in a variety of chamberings – .41 Magnum, .44 Magnum, 10mm, and .45 ACP – as well as several barrel lengths, depending upon your need. Among the large frames is the Model 625, Jerry Miculek's choice when setting his record of shooting twelve rounds, two 6 round loads with a reload in between, in under three seconds.

Extra Large Frame (X) Revolvers

In 2003 the gunsmiths and engineers at Smith & Wesson wanted to deliver maximum power for serious handgun hunters. The power they sought required an entirely new frame, the massive "X-Frame™," and was the basis for the new Model 500™, the most powerful production revolver in the world. This ushered in the era of the "big gun" and was only the beginning. What followed was a 4" barrel Model 500™, strong enough for the biggest game, yet easy to carry. New this year is the addition of a .50 caliber model, with an 8-3/8" barrel and removable compensator, and the remarkable Model 460XVR, with the highest muzzle velocity on earth. *For ultimate power and velocity there's nothing even close to an X-Frame model handgun.*

Model 500™

Custom Engraving

From our very beginning we've been offering custom hand engraving, by some of America's finest master engravers, to our customers. We've been creating family heirlooms with one-of-a-kind designs – commemorating a special date, event or accomplishment. Whether you have a specific design or choose to collaborate with our master engravers each handgun is hand- engraved to a beautiful finish with the finest workmanship possible. These engraving services can be applied to newly ordered guns or any handgun in your personal collection. Let us turn today's handgun into tomorrow's treasure. To discuss custom hand engraving call 1-800-331-0852.

Handcuffs

When you put a pair of handcuffs on a suspect, only one word can describe your expectations... confidence. Confidence in the strength, quality, and reliability will keep you safe and the suspect secure. If you are using Smith & Wesson handcuffs you can be completely confident.

Smith & Wesson handcuffs are made with the finest carbon or stainless steel. All handcuffs, restraint chains and leg irons feature heat-treated internal lock works with double locks to prevent tampering. All of our handcuffs and restraints meet the NIJ Standard for strength. For the extra large or small suspect our Model 1 Handcuffs are universal sized – opening 12% larger and closing 11% smaller than standard handcuffs. Confidence...that's why Smith & Wesson is the world leader in handcuffs and restraints.

Smith & Wesson® Academy

Smith & Wesson Shooting Sports Center and Retail Store

Smith & Wesson® Academy

For over 35 years the Smith & Wesson Academy has been considered one of America's finest training facilities by our nation's law enforcement agencies. Law enforcement personnel from every state and over 50 foreign countries have come to the Springfield, Massachusetts facility to receive state-of-the-art instruction, to prepare for and exceed the demanding needs of law enforcement. The academy's superior training gives today's police force the tools necessary to handle tomorrow's most extreme situations. To discuss your needs call the Smith & Wesson Academy at (413) 846-6461.

Smith & Wesson® Shooting Sports Center

The Smith & Wesson Shooting Center offers a full range of shooting instruction and activities for the civilian community. Whether the need is for initial qualification for licensing, improved proficiency or expert guidance, the many training ranges and 20 lane rental range deliver a total shooting experience. You'll feel at home on the Smith & Wesson range.

Smith & Wesson® Retail Store

Within the Smith & Wesson Shooting Center is the Smith & Wesson Retail Store. Fully stocked with Smith & Wesson's finest handguns, ammunition and quality shooting supplies, the retail store supports a total shooting experience. With an extensive collection of Smith & Wesson gear - from apparel to sporting goods to collectibles - a shooter can fully outfit themselves with the quality that Smith & Wesson is known for. For complete details about Smith & Wesson's Shooting Center and Retail Store, call (413) 846-6400.
