*i-Bolt*TM

Introducing the i-Bolt™ from Smith & Wesson

The word *innovation* is built into this rifle's very name. By incorporating state-of-the-art materials and modern design features, Smith & Wesson has defined the next generation of bolt-action with i-Bolt. Every new detail, from the muzzle of its Thompson/Center® barrel to the new technology in its stock, has been developed to deliver optimal precision. Combined, these features deliver the first bolt-action rifle with a level of accuracy and performance that lives up to the Smith & Wesson name.

Scope and sling not included.

A PROPERLY DRESSED EIGHT POINT

- 1. **Recoil Reduction Chamber**
(Patent-Pending)
Fitted for optional 15oz recoil reducer
- 2. **Uni-Directional Checkering**
No-slip handling in any condition

- 3. **E-Z Turn™ Bolt Release**
(Patent-Pending)
Simple extraction
Easy bolt removal
- 4. **Tru-Set™ Trigger***
(Patent-Pending)
Smith & Wesson/Timney™ design
3 to 6lbs click adjustable with tool (included)
3 position linear safety

- 5. **One Piece Weaver Scope Mount**
Posi-Lug™ recoil lug optic mounting system
Recoil blocking and scope stabilizing

- 6. **X-Bed™ Stock Design**
(Patent-Pending)
Innovative internal structure
Strength and rigidity with less weight

- 7. **Flush Sling Mounts**
(Patent-Pending)
Maintains flat bottom profile
Added stability

- 8. **Thompson/Center® Precision Barrel**
90° target crowned
Match grade barrel

The heart of the new Smith & Wesson i-Bolt is the bolt-action with Smith & Wesson's patent-pending E-Z Turn™ Bolt Release. A breakthrough design, this short, 60-degree action requires no side-buttons or mechanical parts to extract – just a simple push, turn and release. In tandem with the other advantages of i-Bolt, the overall result is a more reliable rifle with remarkable out-of-the-box accuracy. And that's before you customize it with the unique recoil reducer or adjustable trigger system. This is more than just a superior new rifle packed with innovations – it's a Smith & Wesson.
