

TIKKA RIFLES

Why is the Tikka T3 taking the American market by storm in a way that surprised even us? Simple. Because it has redefined what a hunter can expect from a rifle in its price range.

The principle around which we designed the T3 is bold: in the twenty-first century, there is no excuse for any company not to incorporate the most desirable features in a rifle, since the technology is there. So the engineers at Sako in Finland and the designers at Giugiaro in Italy went to work around this concept. The result is a rifle that incorporates MOA accuracy out of the box, a silky-smooth action, a crisp, adjustable trigger, a sleek, attractive look and a truly unbeatable price-tag.

## T3 BIG BOAR

A boar is a tough creature that is perfectly adapted to live and operate in the confined spaces of brush and woods. He can turn on a dime, and unleash his awesome power in spite of the tangled mess of vegetation around him. Inspired by the strengths of this mighty game animal, we have created a rifle that would be perfect for the hunter who chases his quarry in dense woods or from a tree-stand, or for the rancher who likes to keep a versatile rifle handy in the back of his pickup.

The T3 Big Boar Synthetic features a quick-handling 19" barrel, cold-hammerforged and free-floated. The stock is made of durable fiberglass-reinforced polymer, and it features a straight

comb and ambidextrous palm-swell. The detachable magazine holds three rounds – choose between 308 Win, 30-06, or 300 WSM. Overall, the rifle measures only 39.5" in length and tips the scales at 6.1lbs.

How accurate is the T3 Big Boar Synthetic? You guessed it. Just as accurate as its full-size brothers: it too passes the 1 MOA test before being shipped to the United States. This makes this rifle an absolute winner in its category.

## T3 SUPER VARMINT

The Tikka T3 Varmint line has met with such overwhelming success that we got even bolder. We have started with a sturdy and glass-smooth T3 stainless action, and built a rifle around it that spells accuracy and versatility. Varmint-hunting is a gadget sport, so we have slapped a Picatinny rail on top of the receiver, enabling you to “accessorize” the rifle to your heart’s content. In addition, the top of the action is drilled and tapped to accept Weaver mounts, like our other T3 rifles.

The fiberglass-reinforced polymer stock features an adjustable comb – an idea we borrowed from our own T3 Tactical. And here’s the kicker: the adjustable comb is perfectly ambidextrous – as is the palm-swell on the pistol-grip – thereby making the rifle perfectly comfortable for right and left-handed shooters alike. Moreover, we have added an extra swivel stud so that you can attach a bipod and still have the front stud for the sling.

The barrel is a true varmint-style tube – heavy weight for maximum rigidity and extreme accuracy. This rifle is perfectly capable of churning out ½” groups at 100 yards with factory loads – right out of the box. The trigger is adjustable from 2 to 4 lbs: as with all Sako and Tikka rifles, this can be easily performed from the magazine-well using a simple Allen key.

In all, the Tikka T3 Super Varmint is designed to provide maximum comfort, accuracy and enjoyment to the most demanding varmint shooter, at a price-tag that is nothing short of unbeatable. The only drawback? Don’t expect prairie dogs to love you after you buy one!

## T3 HUNTER

Until a few years ago, here's what you had to do if you wanted to buy a high-performance hunting rifle. You had to buy a rifle of a reasonably good brand and send it out to different gunsmiths for an action-job, a trigger-job, custom bedding, re-crowning and any other work that would improve the rifle and its accuracy. The long time required for all this often matched the high cost.

With the Tikka T3, these times are happily over. We have done all this work for you, without asking you to wait or pay for it.

The Tikka T3 Hunter features a glass-smooth action, a crisp, adjustable trigger, match-grade cold-hammer-forged barrel and a perfect mating between stock and metal. How does it shoot? Better than any "custom project:" no Tikka T3 is even put on our shipping dock unless it groups within 1 inch at 100 meters (110 yards). Besides this fabulous performance, we have managed to throw in a few extra features such as elegant but snazzy American-style design, easily-detachable magazine and free aluminum scope rings (40mm objective diameter maximum).

## T3 HUNTER

The Tikka T3 Hunter is the flagship model of the T3 concept. It sports a traditional blue finish and walnut stock with the distinctive T3 checkering pattern. Available in several popular calibers between 223 Remington and 338 Winchester Magnum, it is suitable for any type of hunting in North America and most of the world.

It's no wonder the Tikka T3 is literally taking the American shooting and hunting market by storm. Visit one of our Beretta dealers, pick one up, cycle the action, dry-snap the trigger and see for yourself if this is not the absolute best rifle in its price range.

## T3 LITE

While the T3 is designed to appeal to the traditionalist with its satin-finished walnut stock, the T3 Lite uses a lightweight injection-molded synthetic stock that reduces weight a full 7 ounces. You'll notice the difference after a long day in the mountains! Giugiaro Design gave the T3 Lite a stock that combines classic and modern designs in a harmonious and functional layout that is

both handsome and fast-handling. Synthetic stocks are the choice of hunters who must face tough weather conditions. Choose calibers from .223 Rem. for varmints to the .338 Win Mag for moose and bears. Rings are supplied with all T3 models — just install a scope and you're ready to hunt!

## T3 LITE STAINLESS

For even better resistance to the elements, select the T3 Lite Stainless versions. Like other T3s, they're guaranteed to put three shots inside an inch at 100 yards. Where else do you find a manufacturer willing to stand behind a hunting rifle's accuracy, especially a lightweight model? Tikka knows its rifles are accurate; try one and you'll know too.

## T3 LAMINATED STAINLESS

This elegant and sturdy model joins the Tikka T3 family and promises to be a smashing success. This rifle incorporates all the features that have made the T3 a blockbuster in 2003: glass-smooth action, crisp, adjustable trigger (2-4 lbs), free-floating cold-hammer-forged barrel and drop-free detachable magazine. The exterior of this rifle is designed to be equally pleasing to the eye and

tough to the elements. The all-stainless construction, coupled with the durable laminated stock, will ensure that the legendary Tikka accuracy and performance is maintained for a lifetime of enjoyment. Available in ten popular calibers from the .243 Win to the .338 Win Mag, including the .270 and .300 WSM chamberings.

## T3 TACTICAL

This rifle was engineered for the demanding and precise tasks of the law enforcement professional. It features a 20" barrel with non-reflective black phosphate finish, a synthetic varmint-style stock with adjustable cheekpiece and a 5-round, drop-free detachable magazine. The top of the action comes complete with Picatinny-style rail, designed to fit most types of optic bases and accessories.

Also, the rifle comes ready to accept many accessories such as a muzzle-brake and a bipod. Like all Sako and Tikka rifles, this rifle does not leave the factory in Finland without shooting a 1" group or smaller at 100 yards, making it an ideal tool for the law enforcement and civilian market alike.

T3 TACTICAL (Burris scope not included)  
JRTM112

CHEEKPIECE ALLOWS FOR 5-POSITION ADJUSTMENT AND IS REVERSIBLE TO RIGHT OR LEFT.

T3 TACTICAL ACCESSORIES ARE AVAILABLE TO FULLY COMPLEMENT THIS PRECISION RIFLE. SEE PRO SHOP SECTION FOR ACCESSORIES.

## T3 VARMINT

If our standard-barrel T3 hunting models already produce target-grade accuracy, imagine the kind of groups you can shoot with our heavy-barrel varmint line. These rifles incorporate the features important to shooters who demand the kind of hyper accuracy required for serious varmint hunting and bench-rest shooting.

The free-floating cold-hammerforged barrel has a true varmint-style “bull” contour for maximum rigidity and absolute performance. As with all Tikka T3 rifles, the muzzle crown is concave and

hand-turned – a custom feature that will enhance the performance of your rifle by protecting the lands and grooves from anything that may come into contact with the muzzle. The high-impact polymer stock features a beavertail fore-end so that you may place it solidly and comfortably on your bench-top rest or sandbag during your varmint-shooting sessions. The trigger is a dream. It is adjustable from 2 to 4 pounds, and its crisp and creep-free travel makes it perfect for precision shooting.

## T3 VARMINT STAINLESS STEEL

All Tikka T3 Varmint rifles come standard with a 5-shot detachable magazine and aluminum scope-rings (40mm objective lens maximum). In addition to these free rings, the T3 receiver is machined and tapped to accept all-steel Optilock™ rings and bases or Weaver-style bases. This is the kind of versatility you should expect from a high-performance rifle.

Choose between the traditional blue finish and the all-stainless version. In either case, the performance and uncompromising accuracy is the same.
