The all-new Taurus View™

2014 product catalog

MAKING BETTER GUNS.™

Many new and exciting changes are continuing to take place behind the doors of Taurus these days. Some of them may not be so obvious to the naked eye, yet others will let you take a look into the heart and soul of our company and our products.

As our family grows, so does our commitment to you. We continue to make great strides in the areas of our firearms quality, precision and performance. You'll find our dedicated customer service team strives to not only meet—but fully exceed—your expectations.

There is a new culture at Taurus. It is one where each employee takes great pride in what they do every day—and that is making the finest firearms in the history of the company.

While you review the 2014 Taurus Product Catalog, you'll be exposed to some of today's most innovative handguns in the industry. From micro-sized conceal carry pistols to large frame revolvers, we cover the spectrum of today's handgun owner.

The new View, for example, is an ultra-light revolver that lets you look inside the workings of this fine piece of craftsmanship. Concealed Carry continues to grow more and more each year. With the vast majority of states now legal, we will continue to address this category with handguns designed to not only fit your hand, but to fit your body.

We welcome you to our family at Taurus. We will continue to make better guns. It's still our challenge. And it is still MY promise.

Carry on,

A stylized, handwritten signature in orange ink, consisting of several loops and a long horizontal stroke.

Mark Kresser

Taurus Holdings President & CEO

CARRY ON SERIES

It's your choice. It's your right. It's your Taurus.

If you believe the Second Amendment is as vital to our freedom today as it was more than two centuries ago, we've got your back. Introducing the Carry On Series—the ultimate collection of concealed carry firearms from Taurus. Ideal for discreet, reliable personal protection, we've designated a wide variety of Carry On Series pistols and revolvers throughout this catalog.

We're certain you'll find the concealed carry firearm that's right for you.

Every movement has a voice, but not every one has yours. Speak up now at CarryOnMovement.com.

Making better guns

We genuinely believe we manufacture firearms better than anyone else. Unlike other competitors that are merely “assemblers” of firearms, we take great pride in manufacturing a number of components utilized in our firearms. This results in higher tolerances, lower costs, faster prototypes and breakthrough innovations. It's the undeniable advantage that only Taurus can offer.

Taurus Security System®

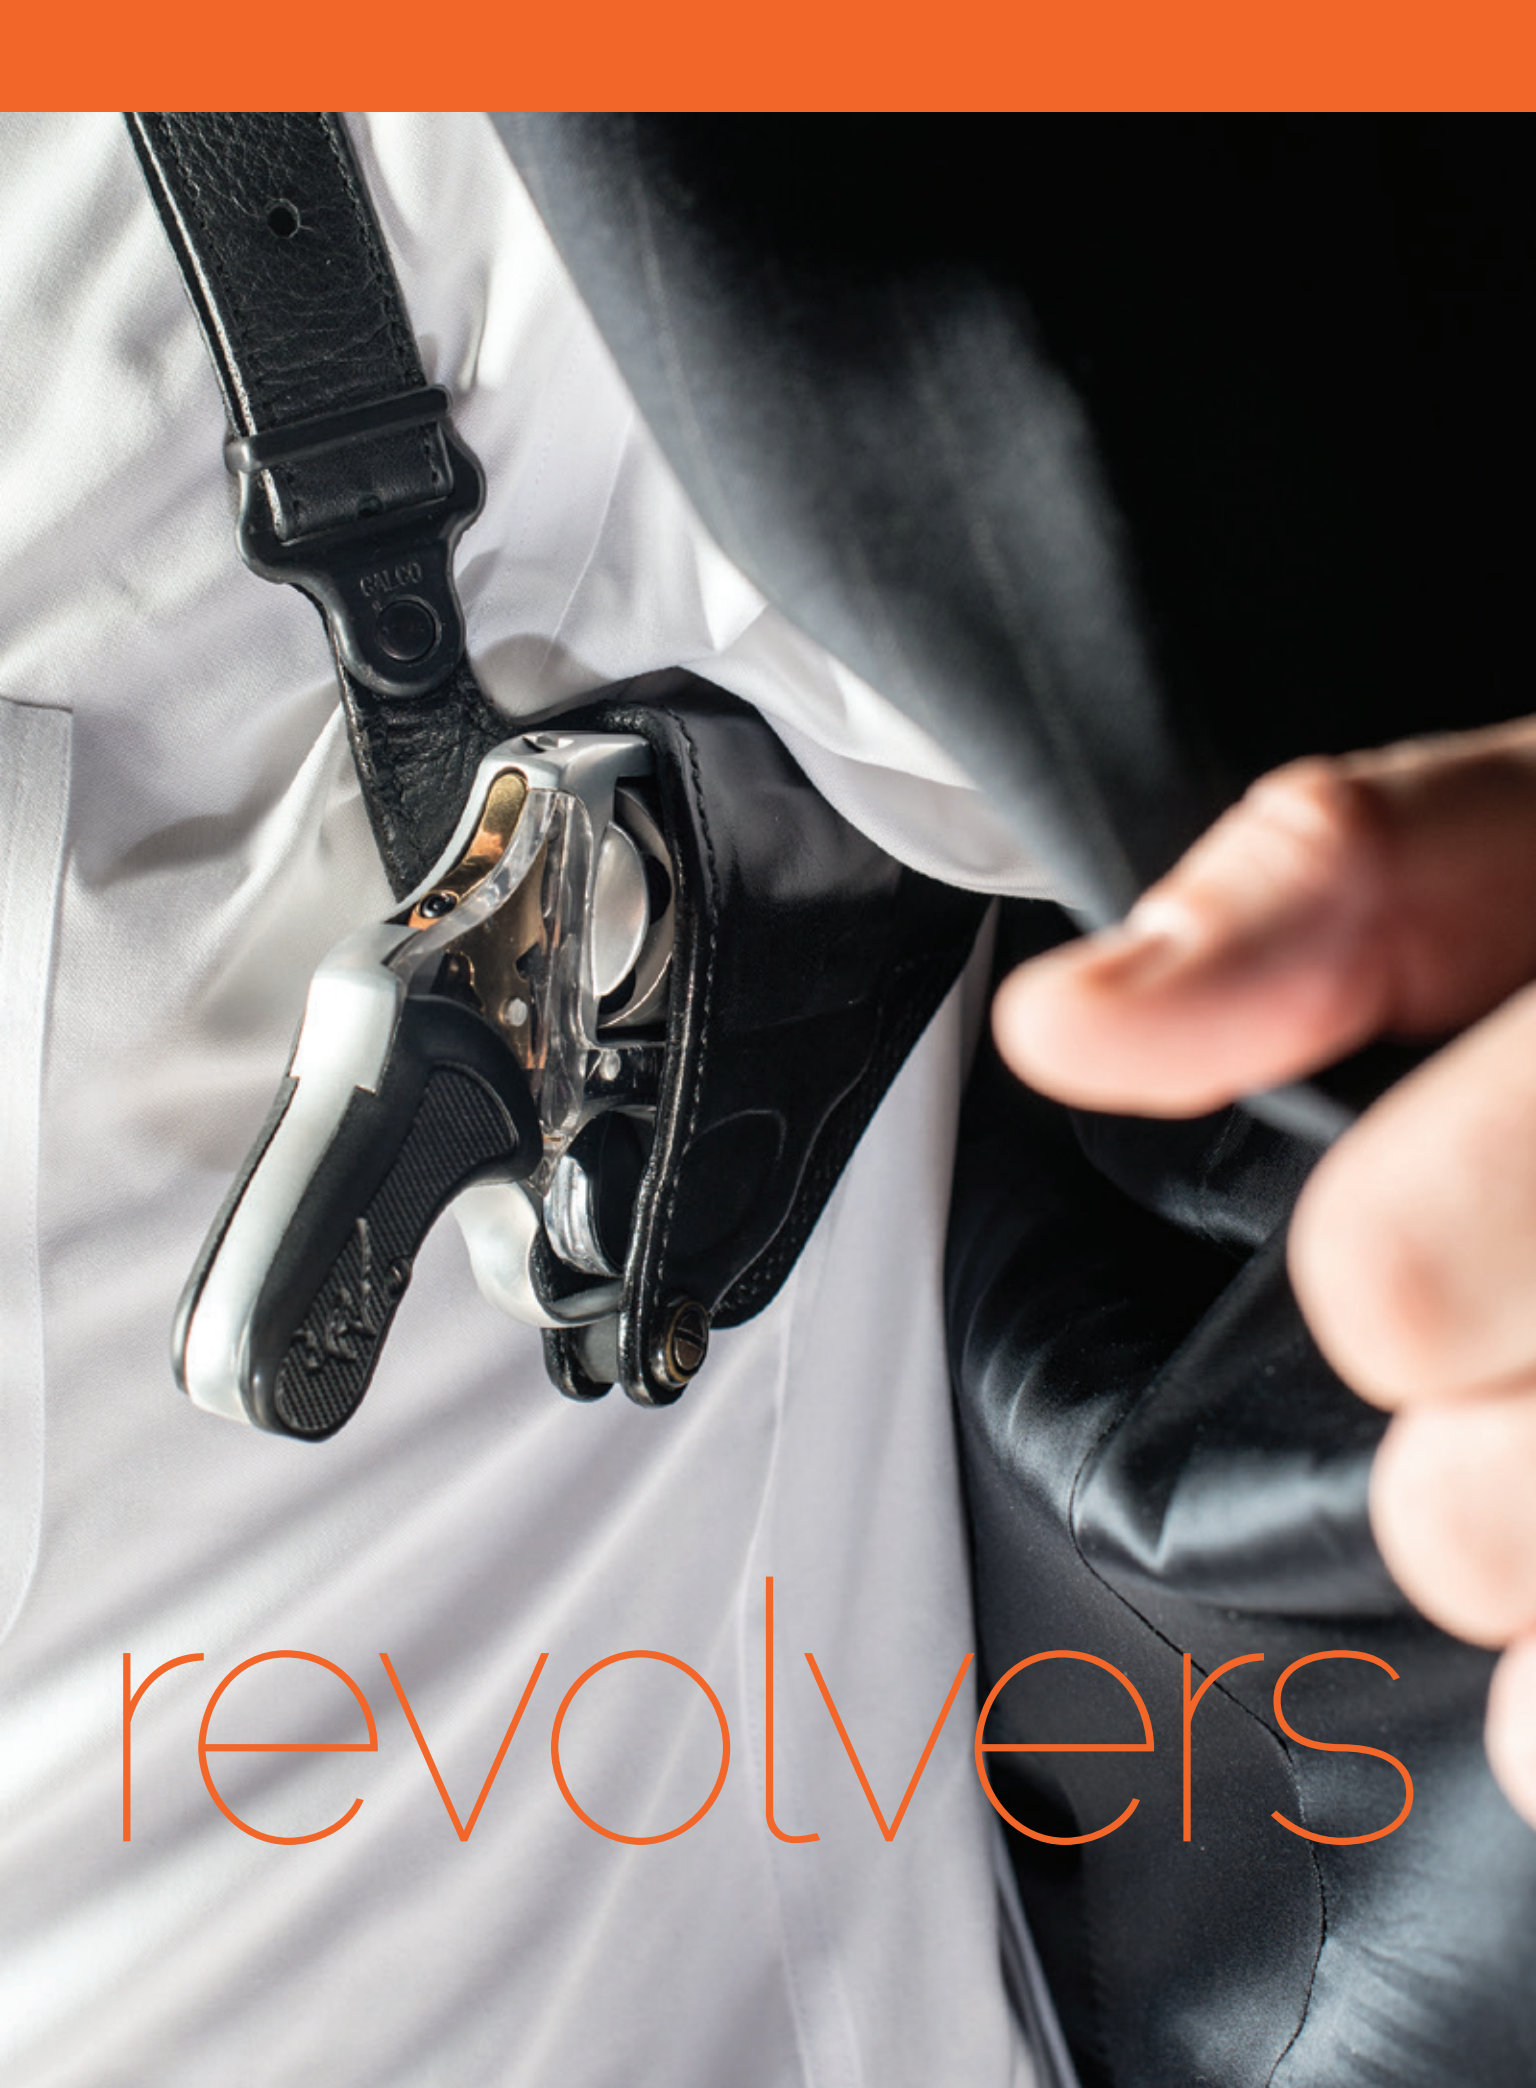

The patented Taurus Security System gives all Taurus firearms an extra level of security with the simple turn of a key. This system is completely inconspicuous and can be utilized at the owner's discretion to prevent unauthorized use of a Taurus firearm. The Taurus Security System is included at no extra charge and comes with two keys.

Security Engagement (Locked): Insert the key into the lock mechanism and turn clockwise until a click is felt or heard and the "lock button" protrudes. The firearm is now inoperable.

Security Disengagement (Ready-to-Fire): To place the firearm in a firing condition, insert the key into the mechanism and turn it counter-clockwise. "Button" recedes when unlocked. The firearm can now be fired.

revolvers

380

CARRY ON
SERIES

MODEL #M380IBULSS
see specs page 32

The Taurus Mini Revolver in .380 ACP delivers Taurus' exclusive 5-shot cylinder, soft rubber grip and low profile sights. Its small size and lightweight frame make it a perfect choice for law enforcement professionals or for concealed carry. The 380 uses Taurus Stellar Clips® for easy reloading.

features

- AVAILABLE IN .380 ACP

Model 605

MODEL #605PLYSS2
see specs page 32

Made for the very serious business of self preservation—the 605 and 905 are built to the Taurus Zero Tolerance standard—in design, fabrication, fit and performance. Meaning, there is simply no tolerance for parts that do not perform as if someone's life depends on them. The 605 is a .357 magnum, 5-shot revolver that is ideal for concealed carry. The 905 is a 9mm revolver that uses Taurus Stellar Clips® for easy reloading.

New for 2014 85 View

MODEL #85VTA
see specs page 32

With just one look, you'll see why the View™ is clearly one of the most ground-breaking firearms Taurus has ever conceived. A radical departure from your typical snubnose .38, the View takes form and function to an entirely unprecedented level. Its exclusive clear-view Lexan® sideplate reveals the intricate inner workings of the firearm, while its distinctive contoured grip and frame ensure a remarkably slim profile. Exceptionally accurate, reliable and lightweight, the View is your ideal choice for discreet, comfortable everyday carry.

513 Raging Judge

If you thought the Taurus Judge® line couldn't get any better, you have to see this. The Raging Judge® Magnum shoots the .454 Casull round in addition to delivering the same popular combo revolver of the original Judge models, and packs a giant six-round cylinder. Besides added capacity, the Raging Judge features the famous red Raging Bull® backstrap for added cushioning and is available in both 3-inch and 6.5-inch barrels. We have finely tuned the rifling to spread the shot pattern at close quarters or to guide the .45 caliber bullet to the target. The Taurus Judge is a decision-maker that lays down the law.

92

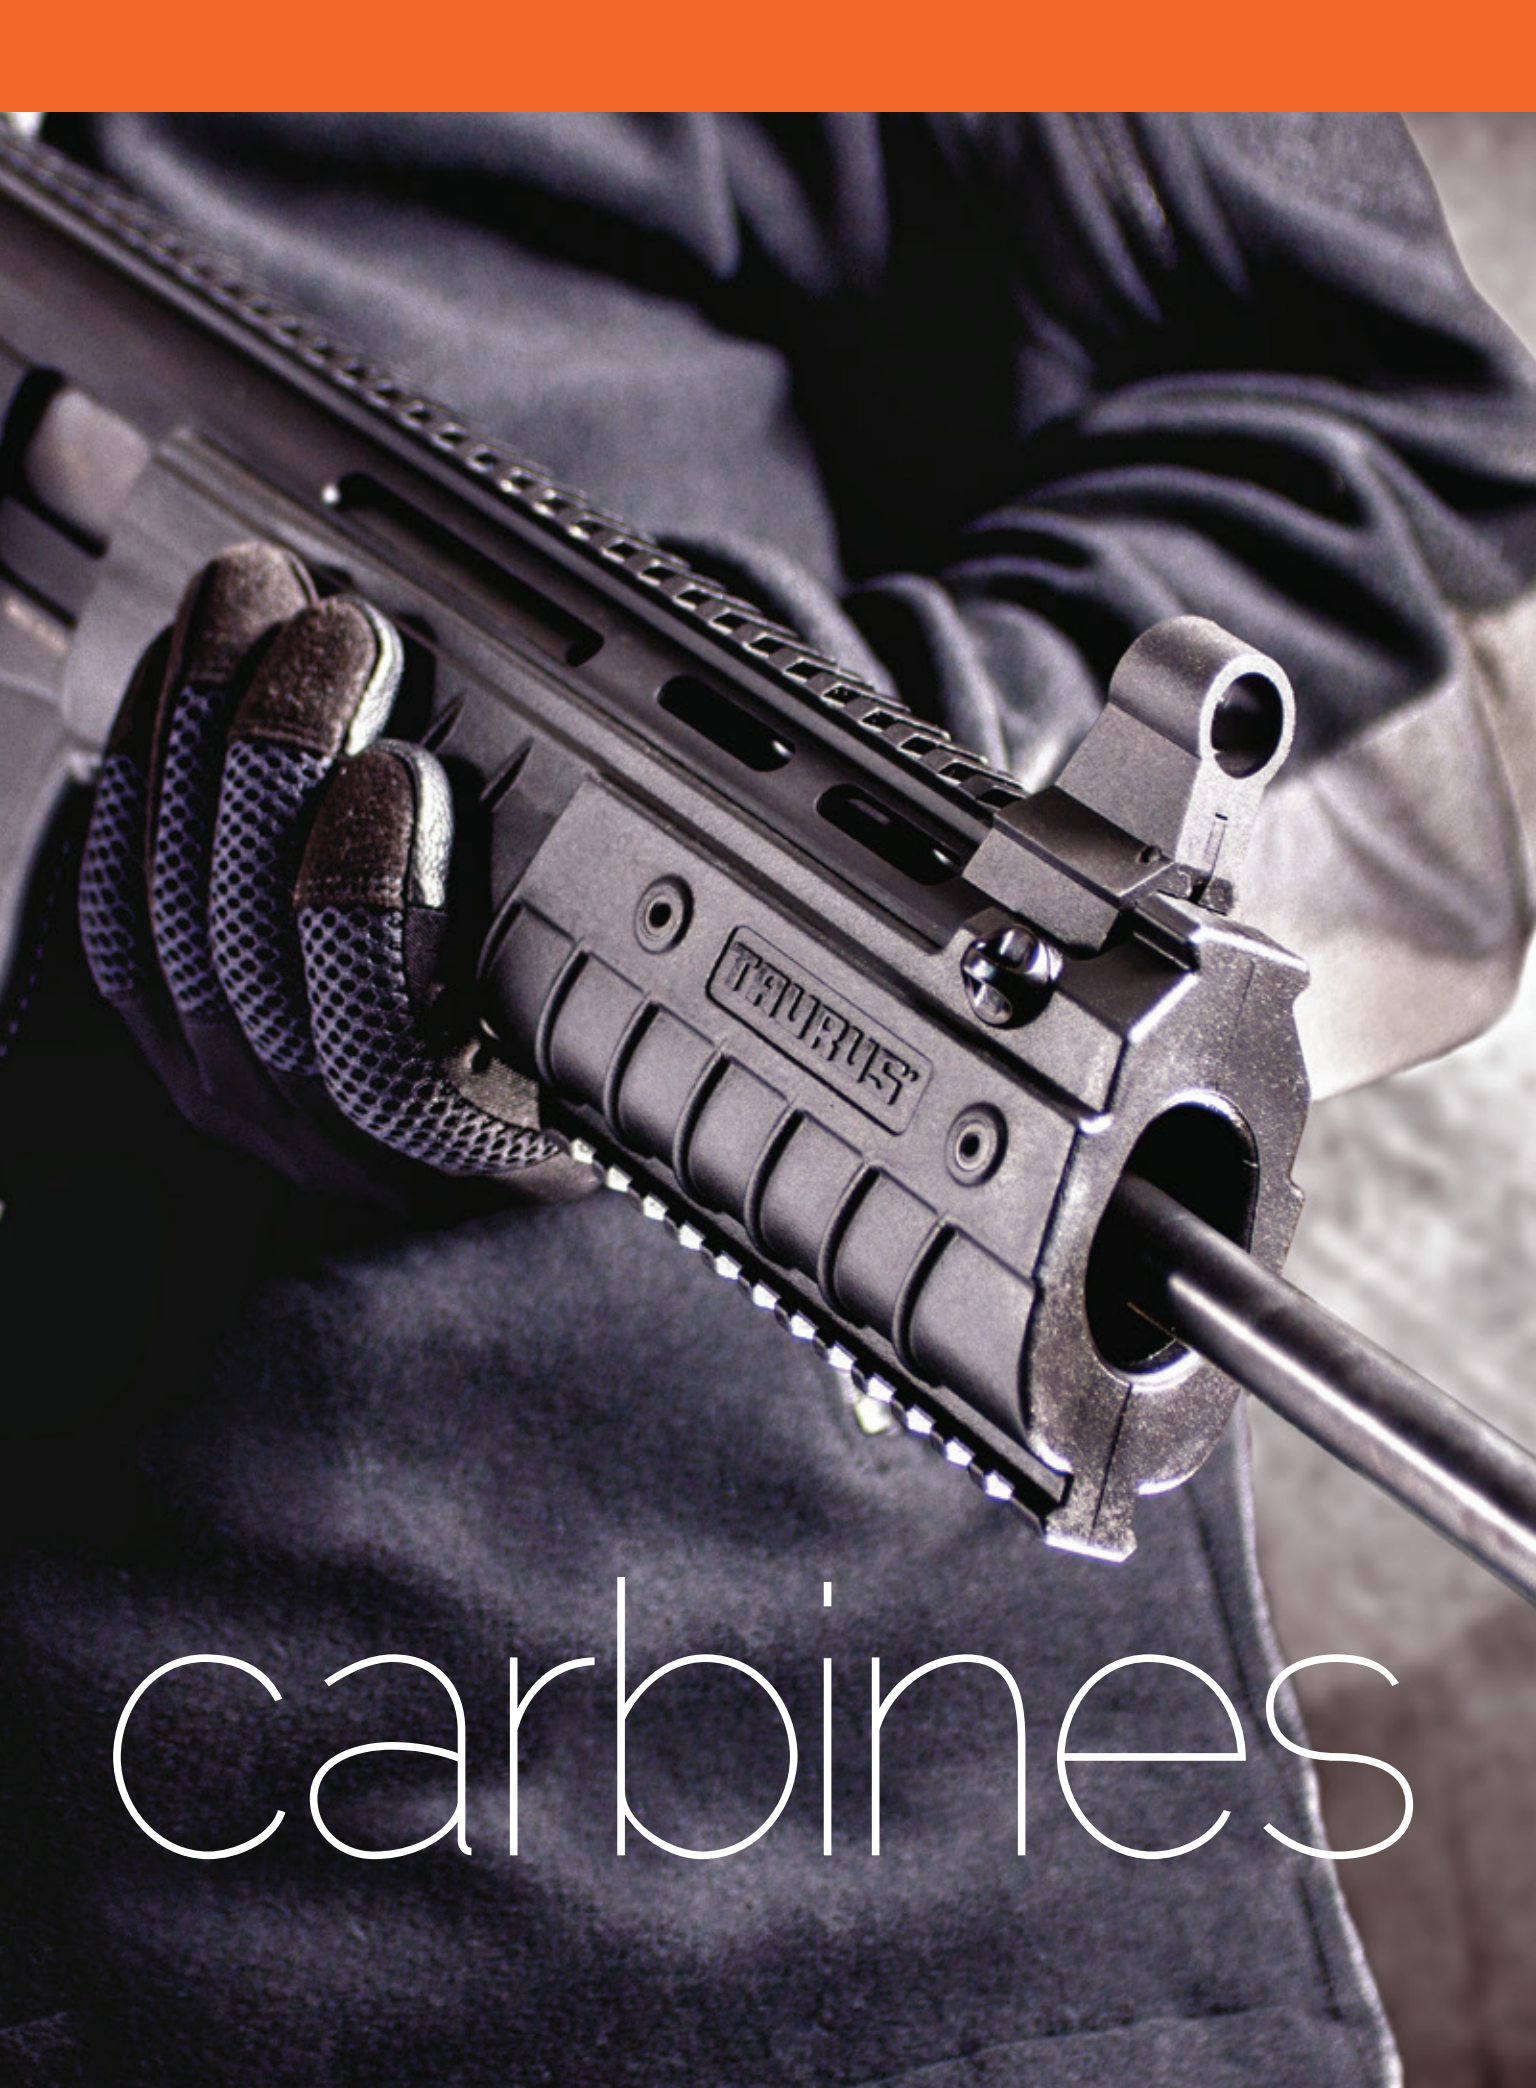

In 1980, Forjas Taurus purchased the Beretta factory in Sao Paulo, Brazil. Soon after, we began crafting a signature new firearm that would combine elements of the classic Beretta design with our own leading-edge innovations. The result? The acclaimed Taurus Model 92. Today, the Model 92 remains one of our most popular—and most reliable—semiautomatic pistols. Built to last with its drop hammer forged, ordinance grade alloy frame, the Model 92 features a three-position, frame-mounted ambidextrous safety that is more secure than a slide-mounted safety, and allows for a classic “cocked and locked” mode as well as a functioning DA decocking lever. Available with fixed sights, you’ll be able to face any situation without compromise.

lasers and sights

Model: FSL-3

This subcompact V3 FSL-3 laser system fits on all Taurus firearms with a Picatinny accessory rail.

Go to LaserLyte.com for more information.

Crimson Trace® Laserguard®

Available for TCP Series, Slim Series and MillenniumPro™ without rail.

Go to CrimsonTrace.com for more information.

WARNING concerning ammunition marked “+P” and “+P+”.

It seems some ammunition manufacturers and reloaders are in a horsepower race to see who can develop the most case pressure and muzzle velocity with little regard for practicality or safety. Some of these loads exceed common sense and can virtually tear metal apart. Taurus Firearms rated for “+P” ammunition are rated for Sporting Arms and Ammunition Manufacturers Institute (SAAMI) compliant “+P” ammunition. **SAAMI does not recognize any “+P+” ammunition at all. It is DANGEROUS to fire “+P+” ammunition in any Taurus firearm and if you do so you may be seriously injured or killed.**

In addition, it seems some ammunition marked “+P” is not SAAMI compliant either. **There are only four calibers that can carry a “+P” rating from SAAMI.** They are 38 Special +P, 9mm Luger +P, 38 Super Automatic and 45 Automatic +P. **There are no other SAAMI approved “+P” loads.** Any ammunition in any other caliber marked “+P” is not SAAMI compliant, may be dangerous and should not be used.

DANGER FOR “+P+”

Never use “Plus -P -Plus” (+P+) rated ammunition in any Taurus firearm.

The Sporting Arms and Ammunition Manufacturers Institute (SAAMI) does not recognize such ratings and such ammunition can be very dangerous. Firing such ammunition can cause catastrophic failure in firearms resulting in serious bodily injury or death.

WARNING FOR “+P”

Only fire SAAMI rated Plus P (“+P”) ammunition in Taurus Models designated by Taurus for +P use as below. Firing +P ammunition in other Taurus products may be dangerous and can result in serious bodily injury or death.

- Model 85 (most models) small frame revolver in 38 Special.
- Model 850 small frame revolver in 38 Special.
- Model 851 small frame revolver in 38 Special.
- Model 85 Polymer small frame revolver in 38 Special.
- Model 82 medium frame revolver in 38 Special.
- Model 817 medium frame revolver in 38 Special.
- All firearms chambered in 38 Super Automatic.
- All firearms chambered in 45 Automatic. (ACP)
- All firearms chambered in 9mm Luger.

WARNING

Even if your Taurus firearm is rated for Plus-P (“+P”) ammunition, such ammunition generates pressures significantly in excess of the pressures associated with standard ammunition. Such pressures may affect the useful life of the firearm or exceed the margin of safety built into many firearms. Unless you need +P ammunition, do not use it, particularly for practice.
